Gill Engineering Associates, Inc.

85 Franklin Street

Needham, MA 02494

Phone: 781/726-6551

Fax: 781/726-6553

Firm Representative:

Joseph Gill, President

Email: jgill@gill-eng.com

Firm Description: Dams, water supply, flood protection, geotechnical, hydrogeology, sewage and industrial wastewater systems, storm water management, solid waste management, highways, tunnels, maintenance facilities, railroads, rail and transit electrification and signaling, mass transit, bridges, traffic, parking, airports, studies, environmental assessments, water quality studies, water quality management, hazardous wastes, architecture, planning, mine mapping, construction management, GIS.

Firm Description: Geotechnical and environmental engineering. Water resources and flood engineering and planning. Ecological impact testing, assessment, mitigation and standard negotiation. Environmental and human health risk assessment and toxicology. Engineering for underground structures, foundations and excavations. Dam and dam safety engineering. Investigation and remediation design and oversight for contaminated sites. Ground water modeling. Construction oversight and engineering.

Firm Description: As a technology based company, we identify and apply the most appropriate technologies to help our clients effectively manage risk and lower total life-cycle costs for constructed facilities. Our Consulting, Lab Systems, Field Systems and Testing services provide clients with a comprehensive understanding of the underground conditions and potential hazards below the surface to effectively minimize the risks of worker, public safety, construction delays, additional costs and damage to property.

Firm Description: Gill Engineering Associates, Inc. (GEA) brings to the table unique and extensive bridge engineering experience difficult to match. A young and growing civil/structural engineering firm who has already proven itself as a respected organization that meets our client's needs on each and every project. With over 50 years of combined bridge engineering knowledge the Gill Engineering team has experience in management and design of bridge replacements, superstructure rehabilitations, condition assessment and capacity evaluation for the Massachusetts Highway Department (MHD), the Massachusetts Turnpike Authority (MTA) and the Massachusetts Bay Transportation Authority (MBTA). Other projects include traffic signal and sign support analysis and heat straightening procedures for damaged bridge beams. We also have the ability to provide emergency "on call" services working with contractors and various clients to get the job completed with little or no lead time.

Firm Description: Two primary divisions: civil/transportation and sanitary/environmental. The former contains a complete structural division. Primary clients are federal, state and municipalities for public sector projects. The firm is a certified Disadvantaged Business Enterprise (DBE) in all New England states.

Firm Description: HNTB Corporation provides comprehensive planning, engineering and landscape architectural services to public and private clients throughout the country. The firm's staff includes specialists in virtually all aspects of the planning-design-construction process. In 2004, HNTB celebrated the 90th anniversary of its founding.

Firm Description: HSH provides traffic engineering, transportation planning and public involvement in various states throughout the country. The firm provides professional services for projects such as ITS, highway planning, transit planning, traffic impact studies, etc.

Firm Description: IBI Group is a multi-disciplinary organization offering services in four areas of practice: Urban Land, Facilities, Transportation and Systems. We integrate our area of practice, our offices, the analytical and evaluation tools we use, and the bringing together of our public and private sector clients. The integration represents our shared vision to create sustainable environments. It promotes smart solutions that identify the relations between development and quality of life by directing new policies and practices to help create better housing, transportation, economic growth and preservation of environmental quality. It is about acting today in order to positively influence tomorrow.

Firm Description: Preliminary planning, economic feasibility studies, design, environmental impact studies, contract plans and specifications, supervision of construction for highways, bridges, structures, traffic, mass transportation, airports, parking, communications facilities, urban planning and renewal, drainage and flood control, recreation and natural resources and site development.

Firm Description: Kleinfelder/S E A Consultants is a firm of dynamic, professional engineers, architects and scientists who provide single source responsibility for efficient and convenient full project services. We offer outstanding service for a smoothly functioning, successful project so our clients can realize their goals. Technical expertise welded to client focus is S E A's trademark.

Firm Description: LGCI offers geotechnical services in New England states for low and high-rise buildings, parking garages, retail centers, industrial facilities, warehouses, hospitals, roadways, bridges, water/wastewater systems and telecommunications facilities. Services include: geotechnical explorations and foundation recommendations during site selection and design; preconstruction condition surveys, geotechnical construction specifications, construction observations and vibration monitoring; and, forensic engineering and failure analysis, including pavement evaluations and design, settlement assessment and analysis of retaining wall and slope failures.

Firm Description: Provides professional services in areas of civil, geotechnical and structural engineering for projects associated with State transportation agencies and private clients.

Firm Description: Consulting engineers specializing in the processing, storage and transportation of petroleum products, natural gas, LNG, LPG, ammonia and other liquified gases. Services include planning, design, specifications, estimates, training, startup assistance, regulatory compliance audits and procedures for utilities, industrial installations, marine terminals, airports and fuel storage facilities.

Firm Description: Lin Associates, Inc., founded in 1978, is a SOMWBA-certified minority and disadvantaged business enterprise (M/DBE). Lin Associates provides consulting engineering and construction administration services to local, state, and federal agencies as well as to the private sector. The firm's personnel have extensive project experience, including personnel with active professional engineering registrations in all New England states.

Firm Description: Maguire Group, Inc., founded in 1938, is a full service EAP operating primarily out of the Northeast US and Caribbean Islands. Our clients are public sector at the federal, state and local level, and private development. We are organized into four business Units: Transportation, Buildings, Water Resources and Land Development and Environmental Services. Maguire has twice won the Presidential Award for Design Excellence, and a national ACEC award for our ethics policy.

Firm Description: Malcolm Pirnie, Inc., now in its second century, provides independent judgment in environmental consulting to government and industry nationwide.

Focusing on protection of human health and the environment, our diversified staff offers comprehensive services in environmental planning, water and wastewater engineering, solid and hazardous waste management and air quality.

Firm Description: Meridian Engineering, Inc. was established by three individuals with diverse backgrounds in civil engineering, land surveying and mapping. By appointing a principal to guide each project through the planning, design and construction phases, supported by a staff of highly skilled professionals, Meridian provides timely and effective service. This is essential to identifying the specific concerns of regulatory authorities prior to design. Meridian land surveying and mapping personnel are dedicated to providing quality products and service through the application of both advanced technology and valuable experience. Our knowledge and understanding of the latest surveying techniques, boundary law and procedures has created a sound reputation throughout the industry. In 2002, a new transportation division was started.
